

ABSTRACT

Gifrina Indriani. 2019. The Directing of the Performative Documentary of Social Collaboration After Tsunami Disaster in Teluk Village. Final Project. Visual Communication Design Studies Program. School of Creative Industries. Telkom University.

Abstract of this design was conducted to find out how the mental healing process of development of people affected by the tsunami disaster in 2018, especially people who live in the village of Teluk, Labuan, Pandeglang districts, Banten. The condition of the community at the time of the emergency response received very little attention from the government, only volunteers from certain institutions and organizations were helping at the time, including one of them was volunteer assistants who came from the Association for Environmental and Adventure Activity in Bandung. Limitation problems in this design only include information about the pre and post tsunami disaster in Teluk Village in 2018 and the social collaboration process carried out. The target of this design is the general public and survivors with age over 17 years, the research method used for this design is qualitative so that it tends to be descriptive and use analysis. Data collection instruments used interviews, observation, and study of literature.
