Activities outside the home are fun plus if there is a game it will be very fun, the park is one of the fun places a lot of activities ranging from hanging out with friends, sitting around relaxing, or just sitting for a moment to eliminate fatigue, apart from that the function of parks in urban areas is to add visual beauty and is expected to play a role as a container or gathering place that can function as a social function. Parks can be used as family tourist attractions, as well as playgrounds for children, and sports. In the park Regol has a bridge that connects the front of the park on the side of the public road with the park inside the community housing. On the bridge the lack of maintenance and lighting makes some holes and holes because there are trees around the bridge and the citarum river which makes it look scary because the current is swift and brown, but the shortcomings in the Regol park bridge are the lack of lights or lighting on the bridge when it was dark at night so that people passing by could not see the bottom can make stumbling and impress scary because of the large trees with minimal lighting. but the shortcomings in the Regol park bridge are the lack of lights or lighting on the bridge when it was dark at night so that people passing by could not see the bottom can make stumbling and impress scary because of the large trees with minimal lighting. The solution of the existing problem is adding lights or lighting to the bridge with durable and waterproof material, with added innovation so that the bridge in Regol park makes it interesting for visitors and eliminates the impression of being spooky.
