

ABSTRACT

In this final project proposal contains the background of the issues raised by the author at type 50 houses, Cherryfield Cluster, Cherryfield Housing, Ciganitri, Kab. Bandung. The author designed a bedroom set furniture that is smaller than usual, given the limited size of the land so that furniture at normal size will have an unfavorable impact on residents. The study was conducted with a qualitative approach and continued with a design using the S.C.A.M.P.E.R method with comparative analysis studies. It is hoped that this final project proposal can continue to be the final task of the writer and can be useful for the writer and other parties.
