

ABSTRACT

This designation aims to attract users of public facilities to be more comfortable waiting, especially with reading activities on public facilities in the bus terminal. The background of this design refers to the problem of reading room facilities in a mini library located in Leuwi Panjang Terminal which has a central reading room facility or a mini library that does not have supporting facilities such as tables for reading activities in the presence of diverse books.

This research was conducted with a qualitative design method that is by means of research approaches such as interviews, observations and literature studies for data collection so that it can produce material design decisions, shapes, colors in accordance with the objectives in designing tables at public facilities in the mini library at Leuwi Panjang Terminal.

Key word: : design, table, Leuwi Panjang Terminal, library.
