Based on Rencana Strategis Dinas Kesehatan Kabupaten Agam For 2016-2021, it was stated that the development of The Maternal Mortality Rate on 2011-2015 is still not stable and the development of The Children Mortality Rate on 2015 increased. This condition is caused by various factor, one of them is the healthcare facilities for maternal and children patients which appropriate with the standard of healthcare design is still not available. Kabupaten Agam now only has 2 available hospitals, one of them is Rizki Bunda Women and Children's Hospital in Lubuk Basung which is a type C Private Hospital. The existence of the Rizki Bunda Women and Children's Hospital is very needed because of the number of population is always increasing, and naturally the number of woman, pregnant mother and children are increased. This increasing needs is still not balanced with facilities which appropriate standard healthcare design, such as inadequate building area, room layout which is not effective yet, and the room atmosphere is still not support the recovery process.

The redesign of Rizki Bunda Women and Children's Hospital is using the Space Psychology Approach based on the user psychology and user characteristic. The existing problem solved with the theme "Healthy and Friendly Environment," which is a hospital that provides a healthy and friendly environment by the interior element so it can make a happy feeling for patients while in the hospital, and it hopes can support their healing process. The Healthy Environment applied from the space design planning which appropriate with the design standard, such as from the material selection, ergonomic furniture, effective layout and room organization, and good lighting and airing. The friendly atmosphere applied by the color and material selection from the interior element which based on the effect of color psychology and mother and children character. This design is expected to achieve the ideal of Woman and Children's Hospital design for physical and psychological of mother and children, and the patients becomes more comfortable to get the healthcare services in Rizki Bunda Women and Children's Hospital Lubuk Basung.
