

ABSTRAK

With the development of skateboarding, sports enthusiasts are also increasing. Many parents attend skateboarding school or special classes to spend their free time and learn to play skateboard. Playing skateboard promises to bring positive growth and development for children, not only training muscles but skateboarding can also train coordination and focus power on children. The rapid growth of skateboard enthusiasts in Bandung has not been matched by facilities and facilities that can help train and hone the ability of skateboards in skateboarding. Skateboard Center with an interior building that can accommodate facilities and facilities to develop the interests and talents of skateboarders, also provides and hone their skills in skateboarding, so that skateboards can support to share knowledge and exchange ideas about skateboarding by what is has been discussed by the Indonesia Skateboarding Association (ISA). The interior design of this skateboard center will raise the design concept of "Meet, and Learn" by the problem and discuss the Psychology of Activities, Behavior, and Environment with a design concept that mentions the styling of "Urban Road". The interior design of the Bandung skateboard center is expected to be a means to train, hone, and develop the talents of Bandung skateboarders which can be started early so that it can be prepared on the national or international scene.
