Take care of pets like dogs and cats is one of a hobby which is owned by most of Indonesian people, no exception in Bogor. This hobby is become common among people. Seeing their adorable behavior, pets are capable to make their owner's boredom and stress gone. The hobby of take care of pets is offset by the increasing number of pets. The increase in pets triggers the formation of public facilities such as pet care and has a mutually beneficial relationship between the two. However, not all pet care can fulfill all pet's needs. This is due to the fact that pet care does not have complete facilities. In addition, one of the facilities that is still rarely found in pet care is a playspace area for pets. Though this area is needed for pets to eliminate boredom.

This design has a focus on public spaces, especially pets to meet their various needs. This design also has a focus on adding recreational facilities in the form of playspace areas for pets due to the lack of facilities in Bogor. The purpose of this design is to create a pet care in Bogor for pets and their owners who have various facilities in it by applying a clean look theme and a programmatic approach to create a clean, safe and comfortable atmosphere and observed from another problems, they don't have recreational facilities in the form of playspace areas for pets and a gathering place for pet communities.
