

## **ABSTRACT**

Multiple Personality Disorder or known in general as multiple personality in short is someone that has two personalities or more in one individual. Because the author found a problem within herself about multiple personalities in dealing with two different situations, therefore the problem gave an idea to make an artwork for the author to raise the issue. Then the author thinks is there any (multiple personality disorder) problem in every person especially adolescents. In making artwork, the author chooses the Lenticular medium, which is a technique of an illusional image which is used to produce an image that printed with illusion of depth, or ability for changing or moving when the image is seen from the different point of view. The concept and discussion in the form of multiple personality disorder in adolescents is a goal intended by the author to visualize the discussion in making an artwork, in form of photography with Lenticular medium with the aim to provide an overview of multiple personality disorder possessed by an adolescents.
