The idea originated from anxiety when paying attention to the surrounding environment, such as on the side of the road, and on the river, where there is a lot of garbage scattered everywhere. After seeing the plastic waste that was thrown in the environment arose the idea to make waste as an abstract work of art. The rubbish will be taken and collected, after that plastic rubbish is made according to the ideas that have been made by the author.

In the work of the final project entitled "Processing Plastic Waste as Abstract Artwork" uses an abstract painting approach with plastic waste media. The creation of this final project wants to pour visual exploration into the scope of plastic waste in the surrounding environment. One of the concepts of this final project will be to reconstruct the plastic waste into an abstract work of art that can be enjoyed by all people.

In creating this final project, the aim is to realize the visualization of plastic trash objects that have been taken to become abstract works of art, as well as displaying abstract art forms in accordance with the textures obtained from plastic waste that is burned by the Heat gun and also the candle. Plastic waste is taken from the surrounding environment and forms a visual that represents the current state of waste.

Keywords: neighborhood, river, sea, plastic waste, abstract painting, recycling, visual exploration, and artwork
