

ABSTRACT

The amount of data that must be processed on the part of the administrative officer of CV. Four Brothers made it difficult for administrative staff to process data so that sometimes there were errors that required officers to carry out reprocessing. This leads to many mistakes. Therefore an application is needed to assist the administrative staff in processing customer order data and goods purchasing data to suppliers so that they are neatly organized and run smoothly.

The system to be built is a web-based application that uses. PHP, HTML, CSS as a programming language and MySQL for databases. For the development of the system using the MVC model because it is on the development of the existing system, and making given a time limit.

With the completion of the development of data collection applications for the purchase and sale of clothing materials, it is expected that the company can process customer order data and purchase materials so that they are neatly organized and transparent.

Keywords: orders, sales, purchases, applications, and data collection applications purchasing and selling fabric.
