

## ABSTRACT

---

*The people's penchant for seeing only based on their behavior and forgetting the importance of caring makes many pets suffer from dangerous diseases. This is compounded by the lack of information possessed by pet owners and the lack of veterinarians. By creating information media as a place to share knowledge so that they can educate the public about the symptoms of diseases affecting their pets, the public can find out about the symptoms of diseases affecting their pets.*

*Keywords: Pets, Disease, Diagnosis*
