ABSTRACT

Agriculture is very promising to explore the benefits in it. Not only relying on agricultural goods, but we can maximize MSMEs in agriculture. The UMKM is a golden key in the recording and transparency of agricultural sales to prosper farmers and those around them. Therefore, by using tools that can help MSMEs to develop agricultural goods recapitulation, it is likely to be able to prosper income from the sale of farm goods to those who manage them. Point of Sales is a step in technological progress in the sale of agricultural goods, especially seeds and fertilizers. Especially in the field of warehouse inventory, it can record goods accurately. Develop in this app using the waterfall method

Keywords: POS, Inventory, Waterfall
