ABSTRACT

Presence and Payroll is a matter that must exist in a company. In CV. Dya Motor, the Presence of Employees often faces obstacles in scanning fingerprints for recording attendance. With the presence of presence using the QR Code, this is expected to make attendance records better. And payroll that was originally done manually, can be helped by the application. An attendance recording application was made with a mechanism using QR Code scanned by an Android device and also a payroll application that can facilitate employees in attendance and remuneration activities.
