ABSTRACT

The Crime Complaints Report is an application that helps the community in matters of security, and peace in the area of Baleendah. In carrying out its duties, the Crime Complaint Report works with the Police to complain about problems in the community regarding potential security threats. A Crime Complaint Report Application in the Web-based Baleendah area is needed to speed up and simplify the crime complaints process to the Crime Complaint Report and guarantee the full data of complaints that will be reported to the Police in Baleendah area. This application is made using the JAVA programming language as a web server. The database is created using PhpMyAdmin and MySQL.
