

ABSTRACT

In the process of prospective customers who want to consult and order interior design or other services must come to the office directly. In addition, the company promotes interior design services by advertising in print media, advertising in newspapers and distributing information from the company that is less well known to the wider community.

The system to be built is a web-based application that uses PHP, HTML, CSS, Javascript as a programming language and MySql for databases. For system development using the prototype model because it was developed according to company requirements.

With the completion of the construction of consultancy applications and ordering home interior design is expected to be made by the company to provide solutions and promote interior design that has been achieved to the wider community.

Keywords: customer, consultation, promotion, interior design.
