Sports activities have become a necessity of life for the community, especially urban communities or commonly referred to as urban communities, especially urban young people who spend a lot of their free time with sports, so that in this regard many sports communities whose members are young people are emerging, from students to students who already have jobs. The formation of a community can be a place for young people to develop their talents, can channel their hobbies, and can be a place for effective socialization, so that with the presence of this community community members need a place to carry out these activities safely and comfortably.

This design will focus on the public needs, especially the needs of one extreme sports community, namely skateboarding that does not yet have public space facilities specifically for the skateboard community that is equipped with indoor skateboarding facilities and other supporting facilities in accordance with the needs and lifestyle of the a member of the Cimahi City skateboarding community. The purpose of this design is to create a design of public space facilities especially the skateboard community center that is needed by young people of the Cimahi City community that is comfortable, safe, attractive, and follows the lifestyle of Cimahi City skateboarders, namely the lifestyle of street skate players as well as looking at other issues, namely the unavailability of a place to gather with other community members, the space facilities at the skateboard community center were made to be able to accommodate some of the activities and activities of other community members besides playing skateboarding.
