

ABSTRACT

Bina Insani Husada Clinic is a private clinic established by midwifery graduates in Bandung, located at Sindang Sari street number 09, Ciluluk Village, Cikangkung District, Bandung City, West Java Province. This clinic serves inpatient, outpatient and childbirth services. In this clinic all data management and recording using a manual system and financial records haven't reached accounting standards. As a result, the data is not grooved and not properly recorded, making it difficult to search data. This web-based application is built by the object method, then the development of this application uses SLDC waterfall, PHP program, and codeigniter framework. The functionality of this application is the management of registration, management of employee salaries, general journals, ledgers, and payroll reports. This application uses black box testing.

Keywords: Finance, PHP, Codeigniter
