The university is an institution of higher education and research, which provides academic degrees in various fields. A university provides undergraduate and graduate education. Diponegoro University is a campus that opens branches with the name of the Program outside the main campus Diponegoro University which is located in the district of Rembang.

University as a place to support education so that requires facilities and infrastructures that comply with the standard as a university, which is not only facilities and infrastructures only for the place of defense just design according to the needs Impress uninteresting, and affect the improvement of learning patterns.

To enhance the learning of students themselves by fulfilling facilities and infrastructure with the university standards to solve the problem of design that is less in the notice of a dynamic design and design that can make Learning and activities are increasing for user productivity.

The use of concepts and themes about a more dynamic design but still prioritize the formality of a school and apply the complete facilities so as to increase the productivity of users to be able to evangelize education qualifications in Indonesia.
