

## **ABSTRACT**

The design of a hoodie as a means of preventing sexual harassment is an attempt to create a product, which is expected to be able to help the general public in preventing and overcoming sexual harassment. From the data obtained, the number of harassment in Indonesia, especially West Java is still relatively large. Especially in big cities like Bandung, a lot of sexual harassment occurs in public areas such as shuttle, parks, in public vehicles and schools or universities. According to Collier (1992), Etiological sexual harassment can be interpreted as all forms of the sexual connotation that are carried out unilaterally and are not expected by the person being targeted, and the rejection or acceptance of victims of such behavior is used as a material both implicitly and explicitly. It can be concluded below, sexual harassment is a disturbing, annoying, and uninvited behavior or action by a person or group of people against another party that is directly related to the sex of the party they are disturbing and is felt to reduce the dignity and dignity of the person being disturbed. Sexual harassment itself can be done due to several aspects, such as psychological disorders, past trauma or moral damage. Therefore the importance of counseling about sexual harassment to the community, especially children, is very important to do. However, for aspects of the direct effect of sexual harassment, the community must prevent it by other means such as clothes worn. Therefore we need self-defense tools when sexual harassment occurs. Where later this project is expected to be a means of self-defense or a means of assisting authorities and the public in tracking and finding out the perpetrators of sexual harassment.
