

ABSTRACT

Abstract- Kue Balok Mang Salam is a manufacturing company that manufactures food, namely Kue Balok with various flavors. Production is carried out when there is an order. Production costs can be classified into fixed costs (fixed costs) and variable costs. Raw materials and supporting materials received from the center by the branch are managed by recording their receipt. This application is web-based and functionality approved in this application, acceptance transaction, displays the inventory report and the cost of goods manufacturing report, and displays a stock card. This application uses a codeigniter framework that uses the hypertext preprocessor (PHP) programming language and for databases using Structured Query Language (SQL).

Keywords: Inventory, Cost of Goods Manufacturing
