LIST OF FIGURES

1.1 Atmospheric absorption across mm-wave frequencies in dB/km. . . 2

2.1 Fading classification. 6
2.2 An illustration of OFDM system. 8

3.1 Basic model of proposed 5G channel model in Telkom University and Universitas Sriwijaya areas. 17
3.2 Systems model of proposed 5G channel model in Telkom University and Universitas Sriwijaya areas. 18
3.3 Measurement locations of proposed 5G channel model in Telkom University and Universitas Sriwijaya areas. 18
3.4 Schematic of electrical circuit for Arduino microcontroller and BME280 sensor. 19
3.5 GUI of NYU wireless simulator for proposed 5G channel model. . . 20
3.6 Flowchart of computer simulations method for proposed 5G channel model. 21
3.7 An example of NLOS power delay profile of 5G channel model at 28 GHz. 22
3.8 Representative PDPs of 5G channel model. 24

4.1 The proposed 5G channel model with (a). maximum bandwidth and (b). minimum bandwidth at Telkom University. 29
4.2 The proposed 5G channel model with (a). maximum bandwidth and (b). minimum bandwidth at Universitas Sriwijaya. 30
4.3 Outage performances of 5G system based on the proposed channel model in Tel-U and UnSri areas with bandwidth 200 MHz. 36
4.4 Outage performances of 5G system based on the proposed channel model in Tel-U and UnSri areas with bandwidth 50 MHz. 37
4.5 FER performances for outage performance validation based on the proposed 5G channel model with bandwidth 200 MHz. 38
4.6 FER performances for outage performance validation based on the proposed 5G channel model with bandwidth 50 MHz. 39
4.7 BER performances for outage performance validation based on the proposed 5G channel model with bandwidth 200 MHz. 40

4.8 BER performances for outage performance validation based on the proposed 5G channel model with bandwidth 50 MHz. 41
