

LIST OF TABLES

2.1	Overview of LPWA Technologies : LoRA WAN, and NB-IoT.....	12
2.2	Traffic Characteristics and Communication Requirements.....	16
3.1	Smart Meter Technical Requirements.....	21
3.2	Population and Meters Data for Bandung and Tasikmalaya.....	23
3.3	Customer Growth for Utility State-Owned Company (PLN) in last 9 years.....	24
3.4	Costs and Benefits Overview for the Smart Meter Rollout by Stakeholder.....	25
4.1	Total Required Packet per Day for High Density Area : Kota Bandung.....	29
4.2	Total Required Packet per Day for Low Density Area : Kota Tasikmalaya.....	29
4.3	Configuration Parameters for LoRa WAN.....	33
4.4	Configuration Parameters for NB-IoT.....	37
4.5	Target of Smart Meter Installed.....	41
4.6	Total Smart Meter Installed by Year.....	41
4.7	Smart Metering Investment Cost or Capital Expenditure (Capex).....	44
4.8	Smart Metering Running Cost or Operational Expenditure (Opex).....	45
4.9	IS Operation and Maintenance Cost Summary (USD).....	46
4.10	Additional Annual Operational Costs (Opex) for NB-IoT.....	46
4.11	Annual External Benefits for Bandung and Tasikmalaya.....	47
4.12	Total Benefits for all Scenario (USD) in Year 1.....	48
4.13	Total Annual Costs and Benefits for Bandung – NB-IoT.....	48
4.14	Total Annual Costs and Benefits for Bandung – LoRa WAN.....	49
4.15	Total Annual Costs and Benefits for Tasikmalaya – NB-IoT.....	49
4.16	Total Annual Costs and Benefits for Tasikmalaya – LoRa WAN.....	50
4.17	Parameters for Sensitivity Analysis.....	50
4.18	Key Decision Criteria and Recommendations.....	55
4.19	The Fundamental Scale of Absolute Numbers.....	57
4.20	Pair Comparison Matrix for Weighting.....	57
4.21	Weighting Results of Related Parameters : Step 1, Step 2, and Step 3.....	58
4.22	Total Weighting of LPWA-Based Technology.....	59
4.23	Proposed Regulation vs Existing Regulation for IoT.....	60
