ABSTRACT

Making this application aims to help junior high school students in checking problems that often occur in a student. As for the background of making this application occurs because in junior high schools, especially in SMP 48 Bandung in the counseling section in checking problems against students still using paper in checking, bk teachers from junior high school 48 Bandung every semester always hold a checklist of problems in students where checking includes from 4 fields there are personal, social, learning and career fields, in the results of this check the teacher will get the results of students who have problems in these 4 fields and the teacher will conduct counseling on the problems that exist in these students.So the application that the author makes will help the workmanship of the bk teacher to be faster in handling the problem checking of each student, the bk teacher no longer uses paper to check the problem on each student. This application can also help bk teachers in streamlining their work time because this application can be directly accessed by each student using their own cell phone and will send directly to the bk teacher the results of the filling done by students in the form of diagrams
