The Provincial Public Library has many functions, including supporting formal education, providing educational facilities, and supporting local cultural aspirations. The only Public Library in DKI Jakarta which has all the above requirements is in the Public Library of the DKI Jakarta Province (Kuningan). The reason is at the library mentioned, there is a special room aimed at supporting Jakarta's local culture and history, Betawi Culture. Even though they already have rooms following the function of the library, visitors of the Kuningan Library have decreased per year, especially in 2016, towards 2017 and 2018. Some furniture in the Kuningan Library is still not updated, the circulation of the library is also not by the Human Dimension's standards, and Library's signing system is hidden, it makes it difficult to find books manually. Even the storage of books, according to the librarian, is not optimal and can reduce the quality of books stored. Some rooms are not used because of the hot air and dim lighting. Therefore, the attempt to support this design is by pulling off the culture approach and space function approach that adapts the duties and functions of the Provincial Library, to create an atmosphere of the DKI Jakarta Provincial Public Library is more in line with national standards and its Vision and Mission.
