Abstract : As technology develops, people are more likely to use devices, rather than going directly to the library. Libraries in the digital era must be able to transform if they want to be relevant to their times. As well as the Bandung city library, to be able to attract visitors too come, the library must develop to adapt to the current character that is always up to date. Young people prefer the café to be visited from the library, not infrequently café visitors come to work on college assignments, office work or just get the latest information. With the addition of café book facilities in the library, it is expected to facilitate its visitors to get a balanced composition between entertainment and education. And can increase the number of visitors of various ages back in the library in Bandung according to the target library visitors.

Keyword : Public Library, Bandung city, age character
