ACKNOWLEDGEMENT

All praises be to Allah the Almighty for His mercy and blessings He had bestowed upon me throughout my life. His grace granted me the opportunity to take the International ICT Business major at Telkom University and finally allowed me to complete this mini thesis entitled “The Use Of Modified Unified Theory Of Acceptance And Use Of Technology 2 Model To Analyze Factors Influencing Continuence Intention Of E-Ticketing Adoption (A Case Study Of Tix.Id)” as a partial fulfilment of the requirements to obtain the bachelor’s degree in management.

In completing this mini thesis, the author gets encouragements as well as lots of help from various directions. On this occasion, author thanked as much to:

1. Mr Adhi Prasetio, S.T., MM. as my supervisor who always guide me and patiently giving me advice to complete this mini thesis.
2. Ir. Soeparwoto Dharmoputra, M.B.T., my academic supervisor who has been very passionate in guiding and supporting his students, including myself, since the start of the university year.
3. My family. Marcus Schenker and Valentina Verry Kristiani as my beloved parents, Joan Alviano, Thomas Aquinas as my brothers who also help me to gain composure.
4. Irene Praba Yanuarisa for all cheering and supports.
5. All my friends in International ICT Business which I can not mention one by one who always help me with my work.
6. All my friends in my senior high school which I can not mention one by one who always contribute with my work and who always help me with my work

May this research give better insights to understanding technology adoption in Indonesia, the author realizes that the making of this mini thesis still has many flaws both on the content and the writing of books that are still far from perfect constructive criticism and suggestion are very welcomed for future improvements
