

## **ABSTRACT**

*Sugar Gliders are animal that have a natural habitat in Eastern Indonesia, Papua and Australia forests. However Sugar Gliders are on the list of Appendix two or can be said as an animal that endangered but not get any protection from the government. With the formation of KPSGI, the public will be given some educations and socializations in order to preserve the populations. The core problems of this thesis by title “Designing User Interface Website as Education Media about Sugar Glider” are lack of public knowledge regarding to Sugar Gliders, socialization process that held by KPSGI rated still not optimal, and there are still a lot of Sugar Gliders owner that really don’t know about how to take care the Sugar Gliders in a proper way. The primary data collect methods that will be used in this research are interview, questionnaire, observation, and documentation, while the secondary data will using literature review. The purpose of this design is to giving some information and educations about Sugar Glider in order to preserve the populations, and to gather the Sugar Glider lovers in Bandung.*
