

PREFACE

Alhamdulillah, all praise is due to Allah Subhanahu wa Ta'ala for all his blessings, blessings, and gifts so that the author can complete the Final Project that has been compiled under the title "STRENGTH ENHANCEMENT OF HELICOIDAL COMPOSITE STRUCTURE USING FULL-FACTORIAL COMBINATIONS". This Final Project is structured to fulfill one of the requirements for graduation from Industrial Engineering, Faculty of Industrial Engineering, Telkom University. Complementing the gratitude of the writer, thank you profusely the authors say to:

1. Both parents, Endardi and Erna Dewi Susilowati, also family members who are committed to prayer and encouragement, particularly in the work of this Final Project until its completion.
2. Mr. Rino Andias Anugraha, S.T., M.M. as Supervisor I who always guides the writer during the final project work process.
2. Mr. Teddy Sjafrizal, B.Eng., M.Sc. as Supervisor II who has taught a lot, gives constructive criticism, and guides the writer during the final project completion.

The author hopes that this Final Project can be useful for all parties. Constructive criticism and suggestions, I expect since the authors realize that this Final Project is still far from perfection. Finally, may Allah Subhanahu wa Ta'ala bestow His mercy and grace upon us.
