

LIST OF FIGURES

2.1	SDN architecture.	5
2.2	Example Topology	7
2.3	OpenFlow architech	8
3.1	sflow-rt Captured Normal Traffic	13
3.2	sflow-rt Captured DDoS Traffic	13
3.3	Interface of Wireshark	14
3.4	Wireshark-Capture File Properties	15
3.5	Iperf Sending Traffic	15
3.6	Iperf Sending Traffic 2	16
3.7	Simulation Sequence.	17
3.8	Network Topology.	18
3.9	Flowchart Controller.	20
3.10	Collecting Normal Traffic.	22
3.11	Collecting DDoS Traffic.	22
3.12	Result on csv.	23
3.13	SVM Detect Normal Traffic.	23
3.14	SVM Detect DDoS Traffic.	24
3.15	Blocking Port.	24
3.16	SVM Decision Boundary 1.	24
3.17	SVM Decision Boundary 2.	25
3.18	Down Time in Iperf	26
3.19	Down Time in Iperf	27
4.1	Throughput of Normal traffic	29
4.2	DDoS Throughput Without Attack Mitigation	30
4.3	Throughput of DDoS Attack with SVM mitigation	31
4.4	Throughput Comparison Between 5 Attackers	32
4.5	Down Time of Simulation	33
4.6	Recovery Time of Simulation	34
4.7	Accuracy of the simulation	35
