*In the Indonesia Educational Statistics In Brief 2018/2019, the number of Muslim students by religion in each province in West Java is in the first place with 4,375,548 people. The high number of Muslim students in West Java has made parents' interest in sending their children to Islamic schools quite high. Integrated Islamic Primary School is a modern yet religious school and provides a good environment for the development of students with knowledge of Islam. Based on the results of observations and interviews with SDIT Assalam Bandung, all students from grades 1 to 6 follow the 2013 National Curriculum by implementing the full-day school system, from the positive side students get better and deeper mastery of religious material, more time interacting with friends and teachers, from the negative side it makes students bored, and the learning experience is fixated on school. Problems related to the interior are not optimal conditions of facilities and infrastructure which include problems with acoustics, children's ergonomics, ventilation, lighting, and room layout. The theme of the design of SDIT Assalam Bandung is "School is fun" making the school a fun place for students, a space atmosphere that can encourage students to be active, creative, communicative, and also moral. The design concept of SDIT Assalam Bandung is "a comfortable Islamic school for children" as a solution to increase the comfort of teaching and learning activities so that they are more effective and enjoyable.*

**Keywords :** *Integrated Islamic Elementary School, Fullday School, Fun, Comfort.*
