

## **ABSTRACT**

*PT. Telkom Prima Cipta Certifia (TPCC) is an institution engaged in the service sector. PT. Telkom Prima Cipta Certifia (TPCC) provides solutions to the needs of certification, training, and consulting in the field of ICTBM (Information, Communication, Technology, Business, & Management). In the field of accounting, the company has used an application, namely the SIA application, but the application has not been integrated with other divisions, so it takes a long time to run business processes in the company, which results in frequent work delays. Therefore, the financial system has not been well organized. The system used in this study is an Odoo-based ERP implementation. This system is able to connect various types of modules into the business units of a company. The module applied in this research is the Accounting module. The results of this study are the use of several filters contained in Odoo, including: inputting entry fees, inputting activity costs, inputting employee payroll costs. This research is expected to facilitate financial records at Telkom Prima Cipta Certifia (TPCC) to be more organized.*
