

## LIST OF FIGURES

2.1	Architecture of GNS3. . . . .	4
2.2	Djikstra algorithm in pseudo-code. . . . .	6
2.3	Illustration of FRR system architecture. . . . .	8
2.4	Illustration of relation of BIRD objects. . . . .	11
3.1	Flowchart of research sequence. . . . .	14
3.2	Flowchart of simulation process . . . . .	15
3.3	Example of network convergence. . . . .	16
3.4	Traffic observation to measure convergence time with wireshark . .	17
3.5	Topology of simulation with FRR image . . . . .	19
3.6	Topology of the simulation with VM . . . . .	19
3.7	An example of FRR configuration summary. . . . .	23
3.8	BIRD configuration file . . . . .	24
4.1	Convergence time result of FRR in QEMU with various number of router . . . . .	27
4.2	Average convergence time of FRR and BIRD with different OSPF configuration . . . . .	29
4.3	Convergence time result with config 2. . . . .	29
4.4	Average packet loss . . . . .	30
4.5	Average jitter . . . . .	31
4.6	Average Throughput . . . . .	31
4.7	Delay . . . . .	32
4.8	Overhead Traffic . . . . .	33
