

ABSTRACT

Wood scraps available in various shapes and sizes are usually piled up and proportionally compared with the production of the furniture industry for this purpose wood is required to be efficient, one way to use wood efficiently is to use unused wood waste for more useful products. No wonder the wood raw material is used for various purposes. Countless wooden crafts, from furniture, eco-friendly designs, and the use of natural materials it is becoming more and more common as raw material. Marine ecosystems have enormous potential and can also be useful for tourism purposes, one of which is beach recreation. Even though it had decreased due to the impact of Covid-19 a few months ago, it is now improving the economy so that it can grow again. Wearing sunglasses on the beach is not only good for fashion but also good for eye health. So the author raised the title "Utilization of Furniture Waste into Glasses Frame Products for Beach Visitors" the solution from the background can reduce waste from unused furniture wood waste, in designing glasses is also devoted to the beach area because the area has hot sunlight and is always in the sun. under the hot sun makes sunglasses can block at least 99% of harmful UV rays, eyewear products with a vintage concept.

Keywords: Waste, Wood, Beach
