

ABSTRACT

Schools are institutions where teaching and learning activities are carried out by students and educators. boarding school is a type of school that uses the concept of school, hotel, and restaurant so that face-to-face meetings between students and educators can be done 24 hours a day at school and in dormitories. Comfort in each room requires a dynamic and not boring atmosphere so that students who study in it have good focus and creativity in receiving learning. This design is expected to meet the needs of supporting facilities for teaching and learning activities for teenagers who become the nation's successors with their respective characters and expertise.
