

## ABSTRACT

---

*One country that is blessed with a good soil structure and a geographic location where coffee grows, namely Indonesia and Indonesia are the fourth largest coffee producing countries after Brazil, Vietnam and Colombia. Coffee plantations are scattered in several regions in Indonesia, each of which has unique characteristics and is different for each coffee bean. There are several types of archipelago coffee that vary including Sumatra Coffee, Sulawesi Coffee, Aceh Gayo Coffee, Bali Kintamani Coffee, Lampung Coffee, Papua Wamena Coffee, Flores Bajawa Coffee and Javanese Coffee. In Indonesia, there is now a coffee trend marked by the number of cafes and coffee shops that dot every street corner and we can even order coffee online. However, this causes a lot of coffee grounds to be wasted and not utilized. Coffee grounds have quite a lot of benefits, one of which is as an odor neutralizer. Therefore, the author wants to do this research to find out the use of coffee grounds and make it the basic material for making aromatherapy candles as odor neutralizers, and the authors will distribute a questionnaire to produce observational data that can be accumulated as a result of data to determine the benefits of using coffee grounds as a neutralizer smell. And the author uses an experimental method for this research. The results of the research that has been done with a dose of 50gr soy wax and 20gr coffee grounds are almost perfect by making coffee grounds first and then mixing it with melted soy wax by coating it in a glass, it can minimize the odor delicious in certain rooms and can be accepted by the community with an average point scale of 82.63.*
