

ABSTRACT

CV. Aneka Variasi Rezeki is an individual type company that provides party equipment rental services. CV. Various Variations of Rezeki, commonly known as Tenda AVR, are located in Pontianak City, West Kalimantan. The process of recording transactions for renting and managing party equipment that already exists at CV. Various Variations of Rezeki are still carried out manually, starting from rental transactions ordered by customers, proof of transactions, hours of entry and time out of goods rented by customers, recording returns and displaying orders made by customers in each area, and employee wages. This Web-Based Application for Automatic Recording of Party Rental and Employee Wages was built using the PHP programming language method and the CI Framework to solve problems that occur in companies. Through this application, you can record rentals which include recording party equipment that can still be used, recording the entry and exit hours of goods rented by customers, recording returns of goods, displaying orders in each area and calculating wages automatically. Testing this application using the black box testing method. The method of working on the software in this final project uses the Software Development Life Cycle (SDLC).
