

ABSTRACT

Web-Based Application Information on Destinations and Tourism Events and Management of "Fam Trip Pinarak Bojonegoro" is an application that contains information on tourist destinations and events as well as management of tour packages in Bojonegoro Regency. This application takes a case study at the Bojonegoro Regency Culture and Tourism Office. The dissemination of information on tourist destinations and events in Bojonegoro Regency is still not comprehensive, coupled with the lack of information about Fam Trip Pinarak Bojonegoro by the people of Bojonegoro Regency. This application was built to help the people of Bojonegoro Regency in knowing the destinations and tourist events as well as the Pinarak Bojonegoro Fam Trip. In addition, this application also helps the Bojonegoro Regency Culture and Tourism Office in managing the Fam Trip Pinarak Bojonegoro. The use of this application uses the Waterfall method and uses the PHP Framework CodeIgniter programming language and MySQL database. The results of this application can help the people of Bojonegoro Regency in knowing tourist destinations and events as well as helping the Culture and Tourism Office in managing the Fam Trip Pinarak Bojonegoro.
