ABSTRACT

Surya Mandiri Motor *is a workshop located in* Bojongsoang. *In booking service and calling for a mechanic, it is still done manually, namely by coming directly to the workshop, queuing then waiting for the vehicle to be serviced or waiting for the mechanic to come to the intended place, resulting in a lot of time and energy being wasted due to having to go to the workshop first to do this. booking service or calling a mechanic. In assisting students or lecturers in booking services and calling mechanics at the* Surya Mandiri Motor *Workshop, a website-based application is made and uses the CodeIgniter (CI) framework. With this application, it can make it easier for students or lecturers to book services and call mechanics. Service booking data and mechanic calls are entered into the database so that the data is stored properly. In this module, we will discuss the booking service module and calling a mechanic. In this module there are two features, namely the booking service feature and the service for calling a mechanic to the place. For booking services, you can determine the schedule and see the schedule that has been booked or the slot that is still not booked and pay the dp and then upload proof of payment so that it can be processed, but if there is no confirmation it will be considered cancelled, then for those who are offline then just come to the workshop to queue.*
