ABSTRACT

PT. Haifa Nida Wisata is a company that has services in several fields, including Hajj and Umrah tour packages. However, the sales process of PT. Haifa Nida Wisata is still done manually which causes problems that often occur such as file loss and also a process that takes longer so it is ineffective and inefficient. Therefore, it is necessary to build a website-based application which will be used by the admin of PT. Haifa Nida Wisata is in the sales process. Procurement of this application can assist admins in the data service organization of PT. Haifa Nida Wisata. This application was developed using the programming language PHP, HTML, CSS

Keywords: Admin, Application, Hajj and Umrah Tour
