

## ABSTRACT

---

*Website-Based Online Skin Health Consultation Application, is a technology development in beauty clinics. This application is a concept of developing, implementing, and implementing technology that can be applied to a beauty clinic, which can help as a form of interaction between patients and doctors. Therefore, a clinic can be said to be modern if the clinic has applied a technology to one aspect of the clinic. This technology will be in the form of a web-based application. The application to be built is a web-based application that uses PHP, HTML, CSS as programming languages and MySQL for databases. For system development using the waterfall model, and the manufacture is given a time limit. With the completion of this online skin health consultation application, it is hoped that it can help clinics to carry out service activities using the web-based application in an online way and also easy, fast and efficient handling.*
