STIE PGRI SUKABUMI is an educational institution located in the city of Sukabumi, has 2 departments, namely SI management and SI accounting. STIE PGRI SUKABUMI has a vision and mission and determination to participate in developing the economy of the city of Sukabumi. The economy of the city of Sukabumi has developed rapidly in 2015, 2016 and 2019. The creative economy is a fast growing economic sector in the city of Sukabumi. One of the benchmarks is the emergence of many new entrepreneurs engaged in fashion and culinary. Creative economy actors are dominated by young entrepreneurs who are able to keep up with the modern world. The main purpose of designing STIE PGRI SUKABUMI is to design a functional, efficient, and modern interior as a means of maximally educating students in economics, so that they get maximum knowledge, can apply their knowledge to the wider community, and become a qualified person who is able to develop following the modern era. like this. The interior design process of STIE PGRI SUKABUMI uses analysis and synthesis design methods. The analysis process is obtained by making comparisons from other high schools and drawing conclusions from the survey results of high schools in Indonesia, the interview process, and design problems. The synthesis process is in the form of solving problems related to current phenomena. In the analysis process which is then re-evaluated against the design objectives. The results of the design of STIE PGRI SUKABUMI are the results of the implementation of concepts and programming into the space-forming elements and space-filling elements.

Keywords: economy, sukabumi, STIE, modern
