

ABSTRACT

Game Whiz is a startup that focuses on developing educational games by utilizing technology. Game Whiz developed a board game called Square Talks!. Game Whiz has carried out two development Square Talks!. During trials of Square Talks, several shortcomings were found. Therefore Game Whiz will develop Square Talks! third stage. To ensure that development runs properly, good project management is needed, one of which is project quality management. In this project, quality metrics are needed to ensure project quality in the quality control process. In the making of quality metrics, internal control method is used. The data required is scope baseline and the expectations of the project's owner. The results of the quality metrics design consist of 86 critical success criteria, then a quality checklist is formed based on the quality metrics to facilitate the quality control process.
