# ABSTRACT

*CV Nata Daya Mandiri is a company engaged in dealerships, the company is one of the companies that is often used as a destination for applying for internships. In the process of submitting and receiving internships students as registrants and companies have problems namely submissions are still done manually without a system so that registrant data is not managed properly. In addition, students have difficulties in finding information on submissions, until messages for internship submissions that have not been answered by the company so that students have difficulty in knowing confirmation of acceptance from the company if the application is made online. For this reason, in this final project, Internship Registration Application a Case Study in CV Nata Daya Mandiri will be built which can overcome these obstacles using the system. This application development uses the prototype method, built with the CodeIgniter framework, PHP programming language, MySQL database, and editor tools using visual studio code. With this application, it is hoped that it can help applicants apply for internships until the results of their submissions are received and company staff can manage internship data.*
