

ABSTRACT

Currently there are many private islamic school with full day school system that offer their excellent program and facility. Sinar Cendekia Islamic School has their own program that focus on learning based on islamic basic, which aims to make their student to have a strong islamic character, mastering science and technology, insightfull and able to synergize in the international world. Good and appropriate facilities are needed to support the school program. In fact, there are still many deficiency in fulfilling these facilities, such as the unavailability of prayer room as the main thing of the program, then the unavailability of room for skill development, and the room atmosphere that does not support learning. Other than that, the building was for high school and middle school students, but at the moment the building just for middle school students and cause spatial changes. The methods used include, problem seeking, problem solving, implementation and evaluation. This design implements adolescent character approach, so that the design can adjust with character development of early adolescent. The main goal of the design is able to communicate values of the school program.

Keywords: *full day school, islamic values, adolescent character*
