

## ABSTRACT

Designer profession is quite a lot in demand these days. This is because many companies need designers to be able to help their business increase sales during the pandemic through a design. However, to become a great designer and fulfill the company's competence, Designers need to hone their skills even further, one of which is by creating a design portfolio.

In times of pandemic like now, there are many things designers can do to get noticed by companies and get jobs. One of them is to market its capabilities through an online portfolio for free. However, currently there are very few appropriate places for designers to store quality portfolios that are in line with the needs of current trends. Therefore, the purpose of this final project is to create a website for designers to use in creating online portfolios, which can support them in developing their careers in the current digital industry era. This website has several views that can assist designers in making their portfolios online such as, a view to create a new portfolio post, a view to edit posts, a view to search for a design portfolio based on the categories that have been created and a view to view the detailed contents of the design portfolio which is also available on this website. support with 3D & AR Viewer if the portfolio contains elements of 3D objects. Based on the website that has been created and the analysis of the test results that have been carried out, it is concluded that the Design Box website can help millennial generations who want to become designers in accommodating online portfolios.
