ABSTRACT

AA GUN feed store was established on February 17, 2016. AA Gun feed store is a micro business which is engaged in the sale of feed for poultry, rabbits, cats, fish, accessories, etc. The store is located in Sekeawi Village no. 39 RT 02/09, Sukamenak, Margahayu. The main activity is buying and selling goods. The purchase process is carried out to meet customer needs. The problem faced is that the process of recording accounting for purchases and sales is still done manually by writing. Therefore, the solution needed is an application that can handle the purchase, inventory, and sale of merchandise. The purpose of this application in accounting is to handle purchases, inventory, sales of merchandise, display journals, ledgers, stock cards using the Average method. The method used in the application is to use the PHP programming language, Codeigniter Framework, MySQL database. For the test phase, it is carried out by the black box testing method. Based on the objectives, this application has been able to record all purchase and sale transactions, and can also display journals, ledgers, Average method stock cards, sales reports, purchase reports.

Keywords: :MySQL, PHP, *Codeigniter Framework*, purchase, sales, average, accounting.
