ABSTRACT

Al-Barokah Cooperative is an employee cooperative that has a sales unit. This cooperative sells a wide variety of office stationery needs both for the public and for hospital employees. The cooperative that manages data, this cooperative already has a system, but it still has many errors in both the placement of writing, columns, and calculations on financial statements. This system also does not yet support downloading data such as financial statements and there is only an option to print it. So that the purpose of this final project is to improve the existing system to make it easier for users. The system development process in this final project uses a prototype approach. This study builds a web-based application that can help companies solve existing problems and run their companies.
