

ABSTRACT

Lighting or illumination is the deliberate use of light to achieve a practical and aesthetic effect. Thus, indoor lighting is an important part of the room. This design aims to meet the needs of users in the living room of a house on Bidara No.6 by adjusting the type and function of lamps with an American style concept. In general, there are still many houses that do not apply good and correct lighting, therefore this concept was chosen because it is considered suitable to be combined with natural lighting in the house on Bidara street No.6. At the stages that have been carried out in this design, discussing how to design a lamp for a good lounge with the American-style concept of a residence. The stages carried out are such as direct observation and documentation to the location. Through this design, it can be seen that the light settings in the room need to be considered again so that residents feel comfortable when carrying out their activities.
