

## ABSTRACT

---

The majority of the people of Bandung open businesses to support the economy. In building a business in a city, of course, there are permits in accordance with the law. In the world of development system design that can help the community in matters of licensing. List of business licenses can also help the community not to be subject to law because there is no illegal trade. This application is a means for the community to make it easier for the community in terms of legalizing the businesses it builds. The goal is to build a licensing application that can help and facilitate the community in terms of business development. This Web-based business licensing application is an application that can be used at the Bandung city trade or industrial office. This business licensing application can make it easier for people to process business licenses online. This web-based business licensing application is an application that can help employees to process public permission data.
