ABSTRACT

Online Based Violation Applicatoion is an application that is used to assist in the implementation of discipline in schools. Where previously there were frequent mismanagement of data violations committed by studens. Often there is a mistake recording the violation carried out by the teacher, coupled with process of making a report carried out using MS word by the teacher who is taking turns to picket. So from that the students violation system application was made so that the recording of violation of existing data can be stored neatly. This application was built in the web version using the Waterfall and MySQL methods. With the construction of this application, it can help facilitate the implementation of school discipline in recording violations that are often carried out by students

Keywords: Violations, Waterfall, MySQL.
